

铠装加热器

MI cable Heater / Furnace

Heart of the Heater

产品选型 Product Type

内芯数量可选:

单股, 双股, 四股, 六股

The number of inner cores is optional:

Single share, dual share, four share, six share

金属保护管:

一般采用不锈钢等耐高温、耐腐蚀的金属材料制成, 起到保护内部发热丝和绝缘材料的作用, 同时也能承受一定的机械压力。

Metal protective tube:

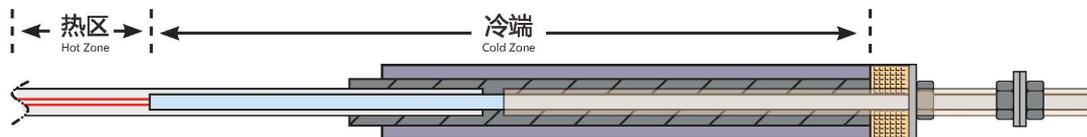

Generally made of high-temperature and corrosion-resistant metal materials such as stainless steel, it serves to protect the internal heating wires and insulation materials, while also being able to withstand certain mechanical pressures.

Material No.	Short Description	AISI (USA)	BS (GB)	AFNOR (FR)	UNI (IT)	Temperature
1.4404	(X2CrNiMo 18-10)	316L	316S	Z2CND 17-12	X2CrNiMo 17 12	650°C
1.4845	(X12CrNi25-21)	310S	310S	Z12CN 25-20	X6CrNi 2521	950°C
2.4816	Alloy 600	600		NC15Fe	B163.166-168	1150°C
1.4876	Alloy 800	800	NA15	Z10NG32-21		1050°C
2.4858	Alloy 825	825	NA16	NFe 32C20DU		650°C

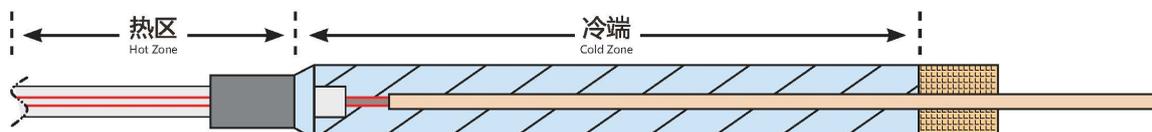

技术参数可根据客户需求订制。

接线方式 Connection Type

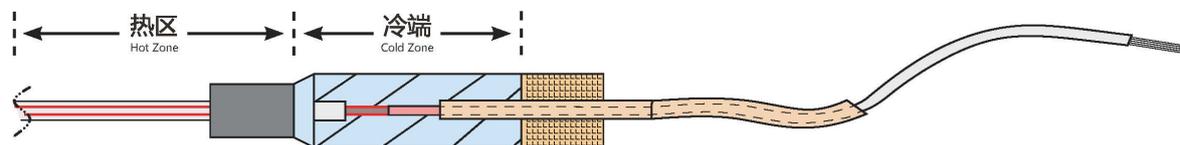

内置冷端
Built in cold zone

外置冷端
External cold zone

无冷端
No cold zone

绝缘材料和物理属性 Insulation Material and Physical Properties

	MgO	Al ₂ O ₃	CaO	Fe ₂ O ₃	SiO ₂	B, Cd, S	C
MgO (97%) (Standard)	>97,0	0,15	0.7	0,09	2,0	>10 ppm	10 ppm
Mgo (High Purity)	>99,4	0,019	0.02	0,018	0,02	>10 ppm	50 ppm

技术参数可根据客户需求订制。

产品说明 Product Description

铠装发热炉丝是一种具有独特结构和性能优势的加热元件，通常由金属保护管、绝缘材料和发热丝组成。由于其耐高温性能强，安全性高，机械强度高，寿命长等特点，被广泛应用于工业加热设备，石油化工行业，家用电器等行业。

Armored heating wire is a heating element with unique structure and performance advantages, usually composed of a metal protective tube, insulation material, and heating wire. Due to its strong high-temperature resistance, high safety, high mechanical strength, and long service life, it is widely used in industrial heating equipment, petrochemical industry, household appliances and other industries.
